PROFILE

Double major in Computer Engineering and Computer Science graduate with hands-on experience in cybersecurity, IT infrastructure, and AI-driven automation. Proven ability to secure enterprise environments, implement LLM-powered workflows, and architect intelligent systems that reduce operational risk and drive efficiency. Certified in Cybersecurity (ISC2) with a strong foundation in threat analysis, endpoint protection, and emerging AI technologies.

EDUCATION

Purdue University, Daniels School of Business

Master of Business and Technology

West Lafayette, IN

August 2026

Coursework: Emerging Tech, Digital Product Design, Tech-Driven Business, Entrepreneurship, Change Management, Computational Business Intelligence, Technology Strategy, Tech Governance and Regulations.

Purdue University, Indianapolis

Bachelor of Science, Computer Engineering | GPA 3.5

Indianapolis, IN

May 2022

University of Indianapolis

Bachelor of Science, Computer Science, Minor in Math | GPA 3.8 | Magna Cum Laude

Indianapolis, IN

May 2022

PROFESSIONAL EXPERIENCE

Blackink IT

Cybersecurity Analyst (Promoted from Specialist after 2 years)

Indianapolis, IN

June 2022 – June 2025

- **Cybersecurity & Risk Management:** Conducted security risk assessments across enterprise environments, identifying vulnerabilities and driving remediation protocols to reduce exposure and strengthen compliance posture.
- **Infrastructure & Endpoint Management:** Led IT upgrades across 3,000+ assets including endpoint hardening, patch management, and configuration standardization, improving security posture and system resilience.
- **AI-Powered Automation:** Integrated automation scripts and AI-assisted tooling to streamline alert triage, ticket routing, and compliance reporting to reduce manual effort and incident response latency.
- **Security Operations:** Standardized incident response procedures and monitored client system security, contributing to measurable reduction in escalation rates across managed accounts.

IT Service Intern

June 2021 – May 2022

- **Automated Ticketing System:** Designed and implemented an automated IT ticket portal using workflow integration tools, increasing operational KPIs by 10% and reducing resolution time through intelligent ticket classification.
- **Threat & Technology Research:** Researched emerging cybersecurity threats and AI-driven security trends to build a technical competency matrix, aligning team capabilities with evolving risk landscapes.
- **Process Standardization:** Centralized and standardized all IT operating procedures, improving cross-team consistency and reducing configuration drift across managed environments.

ACADEMIC PROJECTS

AI Voice Agent — TechIndiana | Emerging Tech

- **LLM-Powered Voice Agent:** Architected and deployed a conversational AI voice agent using LLMs to deliver personalized, real-time website navigation for an Indiana ed-tech nonprofit, across five distinct user personas.
- **Prompt Engineering:** Applied advanced prompt engineering techniques like context framing, output formatting, and hallucination constraints to generate user personas and deployment-ready content packages with high precision on first pass.
- **Full-Stack Deployment:** Built on GCP with MongoDB, Firebase, and SMTP email integration; conducted rigorous AI safety testing for hallucination prevention, multilingual edge cases, and agent boundary enforcement.

Lead Automation Consulting Project

- **LLM Workflow Automation:** Designed and implemented AI-driven automation for junior analyst workflows, leveraging LLMs to handle routine data tasks resulting in measurable time savings, revenue growth, and a new client acquisition.
- **Data-Driven Service Scoring:** Built a service scoring matrix backed by data analytics and research, enabling intelligent prioritization of offerings and optimized resource allocation per client profile.

Product Owner — DevOps & Technology Solutions

- Directed the full-stack development lifecycle of a client website and API, integrating CI/CD pipelines and managing Agile DevOps workflows to ensure secure, on-schedule deployment deliverables.
- Defined technical scope and security requirements for the product backlog, aligning engineering output with client infrastructure and compliance needs.

CREDENTIALS

Frameworks: NIST CSF, SOC, PCI DSS, HIPAA, CIS Controls

Certifications: Certified in Cybersecurity, ISC2 | Business Analytics, Harvard Business (Online) | Certified Peer Educator, NASPA

Languages: Fluent in English, Hindi, and Konkani; Intermediate in Arabic and French.
